Additional Responsibilities:

- Manage the company auditors and develop their skills and the product they give to the company.
- Manage service review meetings with suppliers and manufacturers.
- Develop and put in place a process for reviewing and maintaining the engineering risk assessments.
- Working with HR and the CE assist in the supervision of all the Apprentices.
- Identify training needs within the engineering department and set up with manufacturers and external resource if needed courses for all engineers utilising internal resource when possible.
- To implement Continuous Improvement principle
- To create and update all processes, maintenance plan and work instruction to the Operational Maintenance Service
- Maintain good staff morale and job satisfaction and promote productivity movements in the department.
- Undertake any other duties as assigned.
- Ensure all environmental and safety rules are respected and alert Chief Engineer of any environmental and safety issue.
- Implement key performance indicator.

Skills and Experience Required:

- Exemplary technical skills and mechanical knowledge.
- Full understanding of engineering standards in the bus industry.
- Proven track record working as a manager/supervisor within the transport industry.
- Appropriate training in Health & Safety management.
- High level of computer skills.
- Able to demonstrate good logical and analytical skills.
- CPC qualification and added as a Transport Manger on company Operator's license.
- Driving license.

To apply you will need to send a CV and covering letter explaining how you meet the requirements of the role. For more information and to apply, please contact a member of the Recruitment Department on the following email address recruitment@ratpdev.com.
